SOON_ Junior designer

SOON_ is looking for a passionate, considered, scarily talented Junior Designer to be number 2 in our growing design team. You might be a graduate with a great portfolio or be looking to make your name after a year or two in work. You will really love, and have opinions on, good design - especially digital design.

What you'll get out of it
You will be working directly with Fred Flade (@flicko), co-founder and Creative Director, so this is an amazing chance to learn from the best. If you want to hone your skills, this is the place to do it.

We are a design focused business that makes digital platforms, services, tools and utilities. So you'll be designing for those sorts of applications. We don't do banner ads.

We're a small company and a tight team - we work collaboratively, we share load, we have deep specialist experience but often blend roles. We work hard, talk straight and it's a bullshit free zone.

We're also new, so we have a very flat structure and a punchy start-up mindset where good ideas have a direct line to reality.

We pay fair London wages and encourage decent amounts of holiday.

Things you need to be able to do

1   Get stuck into doing great design work developing new brands, setting art direction or creating web & interaction designs. Show us that you understand design craft: typography, layout, interaction, grids and branding. Digital is what we do!

2   Cope with a challenge. You may have less experience, but you'll be expected to step up and crack meaty design problems (with our assistance!)

3   Have a good working knowledge of the software we use. Predominantly these are Adobe CS6 Creative Cloud products like Adobe Photoshop, Illustrator, InDesign etc.

The mindset we're looking for

- Love what you do	We really care about our clients and the work. So should you.
- Want to learn	Learning new things is what motivates all of us.
- Be proactive	You get out what you put in.
- Show genuine talent	Make us feel like we'll never be that good.
- Attention to detail	We worry, fret and polish till it's right.

Things that might give you an advantage

- A feel and interest for user experience design.
- A passion for interactions, movement and prototyping.
- An eye for illustration
- An interest in photography.
- Being naturally digital, show us your blogs and digital things
- Print design experience.
- Just having interesting , odd, diverse interests, background or hobbies.

What to do next

If you'd like to know more, please send your CV or LinkedIn URL to jobs@thisissoon.com, along with a link to your portfolio, explaining why you think you'd be right for the role.

You will need to be able to work legally in the UK to get the job.
